Quick Installation Guide

Cisco Systems

Model No. **USB1000 (EU/UK/LA)**

1 Install the Driver

IMPORTANT: Make sure to run the Setup Utility before installing the Adapter

A Insert the Setup Utility CD into your PC's CD-ROM drive.

B The Setup Utility's Welcome screen should appear on your monitor. If it does not, this means the Setup Utility is not automatically running as it should. Start the Setup Utility manually by clicking the **Start** button, selecting **Run**, and typing **d:\setup.exe** (where "D" is your PC's CD-ROM drive).

Click the **Install** button.

B

C The *Welcome* screen will appear. Click **Next**.

InstallShield Wizard

Finish
Cancel

F

D Click the **Exit** tab to exit the Utility.

Continue to Step 2 to install the Adapter.

2 Install the Hardware

Hardware Installation

A Connect the USB Connector of the Gigabit USB Adapter to the USB port of your computer.

To do this, slide the connector out from it's holder, unwind the cable, and connect the **USB Connector** to the USB port in your PC.

The Adapter will be automatically detected and installed by Windows.

Your Windows operating system may require you to restart your computer to complete the installation.

A

B

B Connect an Ethernet cable to the Ethernet port on the Adapter, then connect the other end to the Ethernet port on the switch or other networking device.

The setup and hardware insttallation are complete.
